PROFILE

Fourth-year Information Technology student at Bangkok University (GPA 3.79 / 4.00) with knowledge of computer systems, networking, databases, and web development. Experienced in academic projects involving **Full-Stack Web Applications** and **IoT**, applying technical analysis and troubleshooting, as well as information and data management. Interested in developing skills in **IT Support**, **Technical Support**, and **Troubleshooting**, with a strong willingness to learn new IT systems and technologies and apply them to support organizational operations.

CAREER OBJECTIVE

Motivated 4th-year Information Technology student seeking an entry-level **IT Support / Technical Support** position. Eager to apply practical competencies in hardware and software troubleshooting, user technical support, networking fundamentals, database management, and information systems. Committed to delivering responsive technical assistance, diagnosing system issues, and maintaining dependable IT operations while continuously learning organizational technologies.

EDUCATION

Bachelor of Science in Information Technology 2023 – Present (Year 4) | Expected Graduation: 2027
Bangkok University — School of IT and Innovation GPA 3.79 / 4.00

TECHNICAL SKILLS

Programming Languages: HTML5, CSS3, JavaScript, PHP, SQL, C/C++
Backend: Laravel, REST / Web API
Database: MySQL, Oracle Database
Tools: Git / GitHub, VS Code, Figma, XAMPP, Arduino IDE, ESP32, PowerShell

SOFT SKILLS

Soft Skills: Teamwork, Adaptability, Self-Learning, Time Management

PROJECTS

Inventory and Asset Management System **Web Application** | **Final Project**

- Designed and developed a web-based inventory and asset management system using PHP, MySQL, HTML5, CSS3, and JavaScript to organize departmental equipment tracking and resource requests.
- Implemented structured workflows for material requisition, asset logging, and status tracking to streamline operational workflows and reduce manual record-keeping errors.
- Designed and queried relational database tables to ensure organized information management, reliable data consistency, and efficient asset retrieval.

Technologies: PHP, MySQL, HTML5, CSS3, JavaScript, Web Architecture

Product Management System **Web Application**

- Developed a web application using PHP, MySQL, JavaScript, HTML5, and CSS3 to centralize the management of product catalogs, employee records, customer data, sales transactions, and delivery tracking.
- Structured relational database schemas and queries to improve internal data consistency and reduce errors from manual data entry.

Technologies: PHP, MySQL, JavaScript, HTML5, CSS3 | GitHub: github.com/ZeryXaz/DrugStore

Blue Light Detector **IoT Prototype**

- Engineered an IoT prototype using an ESP32 microcontroller, light sensor, and C/C++ in Arduino IDE to monitor ambient light intensity in computer workspace environments.
- Programmed sensor calibration and real-time alert thresholds to notify users of suboptimal lighting conditions, promoting ergonomic safety and reducing eye strain.

Technologies: ESP32, Arduino, Light Sensor, C/C++
